

DEFENSE NETWORKS DESIGN

(INTERNAL)

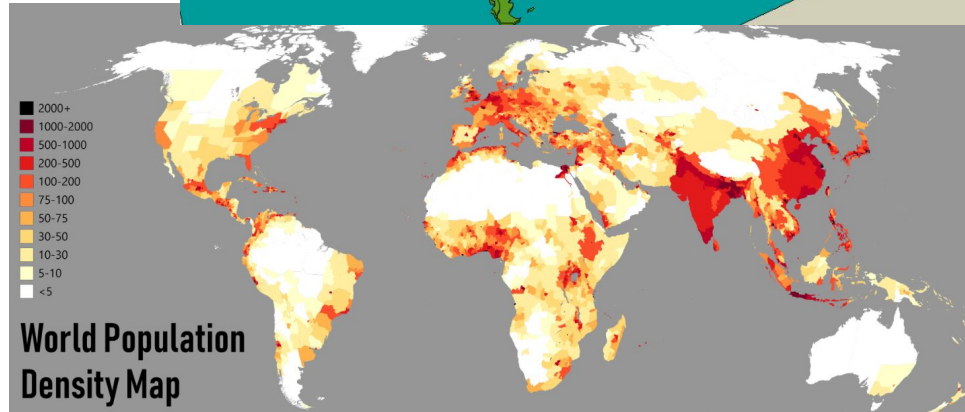

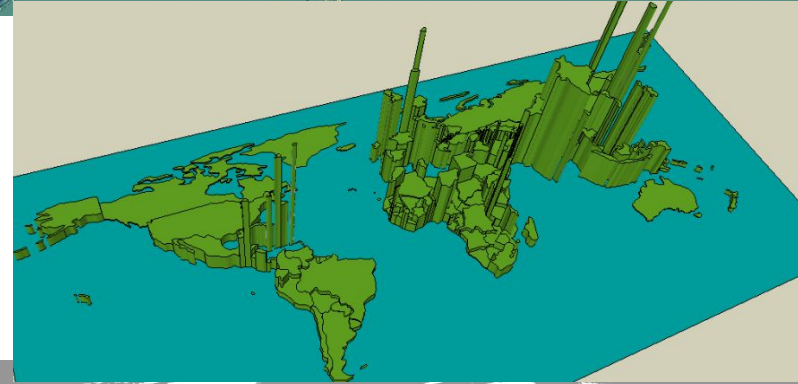

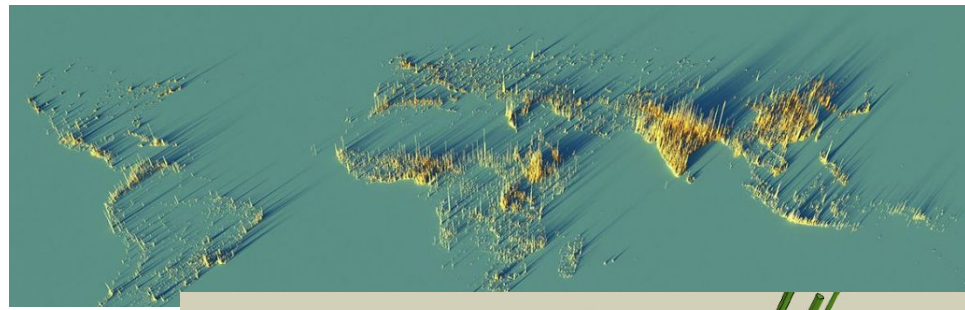

DEMOGRAPHIC

POPULATION

Population is able to be broken down and visualized at local/state/country/etc. Level

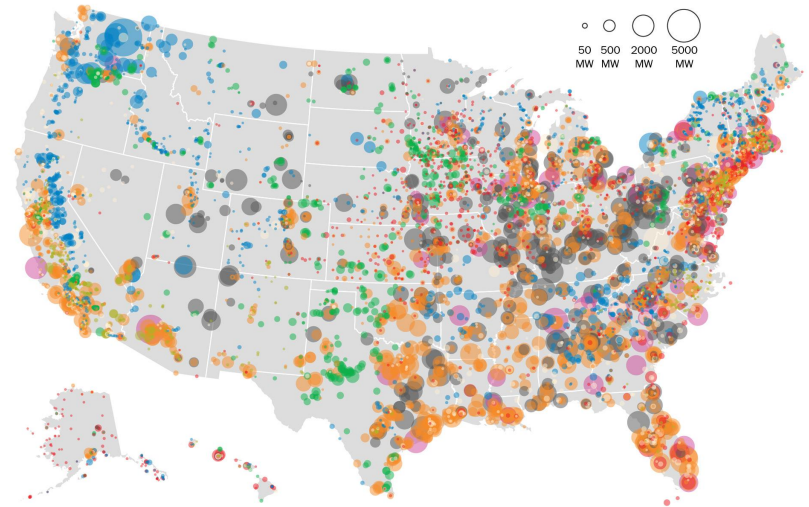

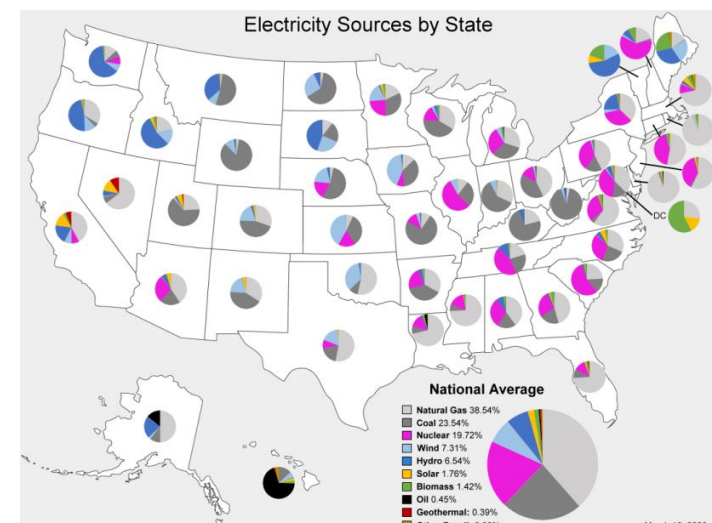

Pull data from many sources and have averaging to provide most accurate possible range of data of true population size

Display predicted population trends based on various changeable variables

POWER

Show how power is consumed/generated broken down by level to best understand where systems/grids may be vulnerable to attack or disaster.

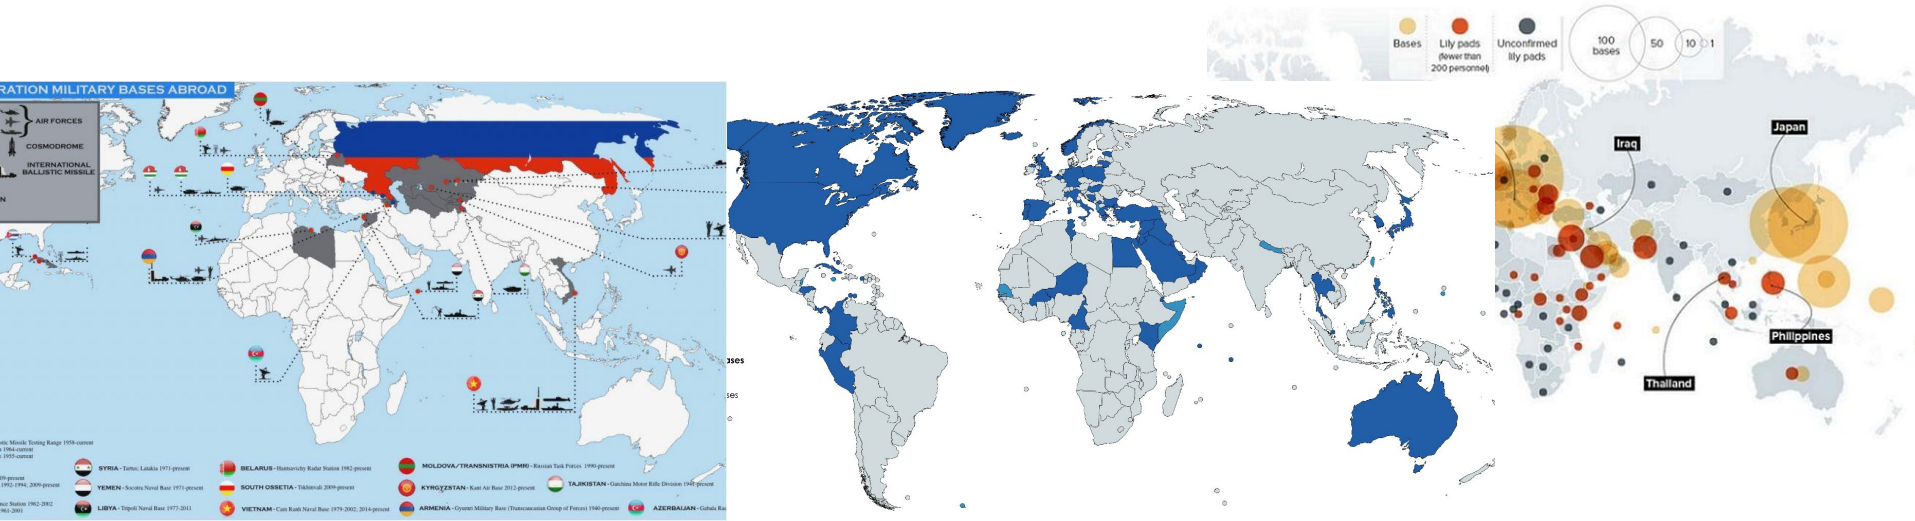

MILITARY

MILITARY BASING & GARRISON STRENGTH

Defense networks track the location, information and size of the military infrastructure of all possible national and private militaries.

This will help in determining what forces are ready/available for response to international conflict or crisis, as well as what areas require stronger security.

ECONOMIC
