

Offer navy policing operations to countries that cannot afford to pay for navy or cannot unify ie India/Vietnam/Ethiopia - FOB of Naval Operations in Djibouti

Focus on automation based operations, aquatic patrol drones etc.

Africa/Indian Subcontinent

Most important thing is actually naval security

Invest 1/3 in navy assists 1/3 in protecting those and 1/3 developing bases

Coma at piracy to protect global and local businesses

Pakistani navy weak

Prometheus can rule entire region by boat

Unsinkable floating ships

Other Supra transport to and in between provide huge regional security

Submarine drones for mine refusal, communications and intel

Navy's orca drone

Operations Craft	Drone Carriers	FOBAS
Transmission of personnel, launch	Removal of submerged ordinance Converted cargo ship Shipping containers with opening roof for drones Quickly swap drone fleets	Base of operations for Naval missions

Build drone carriers instead of aircraft carriers, still able to provide close ground support and partial air superiority, at least against targets with low air capabilities.

fleet of small squad motorboats in bottom of carrier

1st - refit old cargo ship with drone and ship capabilities plus electronic warfare, radar and jamming.

Refit motor yachts/fishing trawlers into lethal clandestine force as "carrier group"

Use hydrogen engines and pull from seawater? Would be awesome combined with desalination
