

# Operation Red Soil

(The Foreign Air Brigades Playbook)

“So many of them and so few of us, how will we bury them all?”  
- Finnish Saying

Problem: Western governments and systems either have willingly handicapped or otherwise restricted themselves in the action they can take to stop authoritarian regimes because of corrupt political and economic ties

“This is a war for all of the West..Please help us to save you. Putin will not stop in Ukraine.” - Petro Poroshenko, former president of Ukraine on the procurement of Western equipment

Goal: Build up the post Soviet bloc states private arms and security industry to properly counter aggression from authoritarian regimes. Put arms in the hands of and train people willing to fight for Western values when the US or other Western governments cannot respond directly.

| Ukraine                                                                                                                                                                        | Moldova/Georgia                                                                                                                                                                                                                                                  | Germany/Italy                                                                                                                     | Romania                                                                                                | Belarus                                                                                                                                                                                                    |

If successful would provide wealth of opportunity in new industry building |
|                                                                                                                                                                                |                                                                                                                                                                                                                                                                  |                                                                                                                                   |                                                                                                        |                                                                                                                                                                                                            |

Will become important parts of all of these countries' military industrial complex in time, greatly diversifying both profits and access to knowledge.

### Role

1. Providing cover for ground forces by countering hostile aircraft
2. Global integrated intelligence, surveillance and reconnaissance
3. Rapid global mobility ex tactical airlift of personnel or supplies
4. Global offensive and defensive drone capabilities
5. Command and control of all air, naval and land based assets

### Priorities

- + Establish FOB first in NW-UKR and secure Belarus border
- + Air defense and pararescue of civilians

Control the seas and the air above on behalf of Ukrainian interests

Retake all national homelands (Crimea)

Proclaim independent statehood and democratically vote on next steps

National crusader state

Democracy crusades - military offensives designed to protect democratic ideals

Seize control of elections then provided a fair and unbiased one conducted by and outside regulatory body

Recruit Ukrainians and foreign nationals coming to fight

Opposite Air Force is incapable of interference

Ex taking down Russian jets, Hezbollah drones etc

### Strategy

Ukraine cannot be lost

Protecting intel and cracking enemies is first priority to best out play enemy

Plant spies in H0 leak false knowledge that spies then provide to H0

Force enemy to send reinforcements to wrong places

### Structure

Air power built mostly on drones rather than fighter aircraft acquired from different sources and deeply modified

Destroy Russian convoys and build wrecked steel into road barricades

Keep finances in bitcoin to avoid government intervention

### Departments

Paratrooper Escort Brigade

- + Build SAS from former British, Australian, Portuguese, Canadian, American & Rhodesian SAS
- + "Attention all fighters with air experience! We'd like to best coordinate our attacks."

+

Tactical Air Rescue Brigade

+

+

Drone Protection and Warfare

Ordnance Defense and Disposal

Satellite communication and intelligence

Overhead Eye and Protection

No bomber brigade. People have used enough bombs in war

Base in Poland close to border at first and simply perform covert ops in

### Stage One - Establish initial eye and ears in post Soviet-bloc states

Send initial recon party to Poland, where they will cross border into Ukraine and see situation on the ground

### Stage Two - Build out strategic capability of Operation

Increase the scope of operations in categories of personnel, infrastructure, equipment and otherwise

| Infrastructure                                                                                                                         | Personnel                                                                                                                                                                                                                                                                                                                              |  |
|----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                        |  |
| Build up state owned assets and land for pennies on the dollar to develop for defense be it security, logistics research or otherwise. | Mine ideological organizations for those looking for higher purpose and with training<br>+ State and country militias<br>+ Foreign brigades, paramilitaries and intelligence services<br>+ Police and military forces<br>Hospitals, first responders and clinics<br>+ Mechanics, machine shops, construction and other technical works |  |
|                                                                                                                                        | focus especially on recruiting from foreign authoritarian regimes that want to fight the creep of authoritarianism. This will come in handy when transferring or pivoting to other anti-regime foreign brigades ie. Taiwan, Kurdistan, Tibet, East Turkestan                                                                           |  |
|                                                                                                                                        | Extreme variance of cultural identity will lead to high success rate of international bodies without government boosting or overreach, leading to a much more efficient and democratic system.                                                                                                                                         |  |

### Stage Three: Planning, discussion and development of specific strategic operations

Create massive space in enemy lines by stretching enemy as far as possible  
will low level defensive insurgencies  
Attack supply line and other logistics with high efficiency to bleed opponents to death in soft battles  
Build deep entrenchments and local defenses  
1000 tiny cuts to victory, for blitzkrieg only leads to disaster

## Stage Four: Active participation in events pertaining to the territorial defense and overall security of Ukraine

### Transport foreign fighters and weapons

- + Use captured and restored Russian armored vehicles and personnel carriers with new markings

### Provide Immediate Aid

- + Provide rescue and medical operations for foreign and local fighters
- + Get civilians to safety and provide medical care/distribute supplies
- + Facilitate communication between both Russian and Ukrainian civilians, organizations and governments

### Provide Intelligence to Ukraine Military

- + Coordinate freelance drone and satellites users with local military
- + Use available drone, open source sat and other assets to local hostile assets for destruction by Ukrainian military

### Military Strategy

Descended from Soviet Union/Finland, if you cannot stand the point of the spear break the shaft instead

### Ambush Supply Lines, Tanks and Armored Carriers

- + Target supply chains and other logistics - focus on tanks/vehicles with antennae, fuel tanks,
- + Teams of 3-4 - anti tank, marksman, security, recon
- + Clear out immediately artillery incoming in 5-7 min
- + Metal blocks is reactive armor and requires tandem charge like javelin no rpg
- + Retreat to major population centers and just don't lose them - fortify heavily with help of civilian population
- + Use drones to hit APCs tanks etc while holding up-or dispersing soldiers/civilians
